JEREMY CHUNG	10%
PEMAL PADUKKAGE	45%
YEU HAW-TEH	45%

Testing: (Acceptance Tests based on User Stories, Unit Tests, Test report)	
JEREMY CHUNG	10%
PEMAL PADUKKAGE	45%
YEU HAW-TEH	45%

Summary of Additions: [Stories & Functionality]

New Stories	
PBI: [24]	As a user (customer), I want to Login
PBI: [25]	As a user (Admin), I can log into the admin dashboard

New Functionalities	
- Display Homepage:	The Homepage displays with: Title, Header-Image. Containers: Recommended Books, Critics Choice.
- Read Description of a Book:	When a Book object is searched or listed on the webpage it will print the Book's description on the page if the Book exists in the database.
- Register a New Account:	A webpage with textboxes for a user to enter their details. Creates a new account with details and places the account object inside the database.
- Search for Books by Author:	A webpage that allows for users to search for a book given they have queried an author's name and there exists a matching author within the database.
- Edit User Details:	Allows a user to edit their user details associated with the data they had used to register their account, given they possess account details and are logged in.

- Login to Account:	Allows users with accounts within the database to log into their accounts through the webpage; prompted to use a username and password.
- Block Users:	The ability for an Admin user to block other users from accessing features on the BOOKEROO platform. This is enabled through a Boolean variable associated with each account.
- Contact Staff:	Ability for users to send a message to Staff via a form on a page. These Messages will be able to be read by Admin users.
- Edit Books:	Existing Books in the database will be able to have information associated with the Book object changed, if the user is an Admin.
- Login to Admin Dashboard:	Access to the Admin Dashboard page is granted given that the user has the Admin user-type.
