Pemal Padukkage 31/08 12:43 am Edited   👍 1

I've pushed a branch up into remote for the searchBook feature, but my main stumbling block so far is getting the book entity to initialise in the database.
I'll be revisiting this tomorrow for the time being.

> **Pemal Padukkage** 31/08 1:43 pm
> Yeu Haw Teh Could you add homy1 as a collaborator? He's asked to join the repository so he can help us find out what's wrong with the book microservice.

🖉 New conversation

Yeu Haw Teh 6/09 4:43 pm
Hey guys, hows the project going?

▾ Collapse all

> **Pemal Padukkage** 6/09 9:04 pm
> It's rather bleak on my end, I'm still stuck on creating the microservice.
> I had planned to drop it and move to the front-end part temporarily, but my team partner in another subject has been absent and I've had to spend a lot of time to make up for the resulting inactivity.
> Overall, I'm not doing too well, but since I finished part of my assignments early, I might have more free time
> See more

> **Pemal Padukkage** 6/09 9:22 pm Edited
> How are things on your end though?

> **Yeu Haw Teh** 6/09 9:55 pm
> i've been going through some tutorial videos about spring and stuff, if you want i can help out with the microservice part Pemal Padukkage. From what i saw it's not too hard to implement but you would need to take care of the front end after that since i'm pretty bad at front end

> **Pemal Padukkage** 6/09 10:28 pm
> have you pulled the booksearch branch?

> **Yeu Haw Teh** 6/09 10:28 pm
> i didn't know there was one

10

PP Pemal Padukkage 6/09 10:25 pm
I did make a post on here about pushing a branch up, but it is pretty e
github page.
It's called 'BookSearchBackEndFeature'

Meeting in "General" **Join**

See more

YT **Yeu Haw Teh** 6/09 11:17 pm
alright

PP **Pemal Padukkage** 7/09 1:22 am
got the post method working, but the get methods are a little trickier
I've pushed everything that's been done so far, but with the fixes I should definitely be able to make more
headway tomorrow.

PP **Pemal Padukkage** 8/09 1:13 am
1:12AM 8/9/21
Pushed changes to BookSearchBackEndFeature that allows searching for book by ID and books by author.
Consult the controller class when using them.

PP **Pemal Padukkage** 8/09 6:36 pm

PP **Pemal Padukkage** 9/09 12:27 pm
so it's working properly on postman?

Meeting in "General" **Join**

YT **Yeu Haw Teh** 9/09 12:27 pm
yes

PP **Pemal Padukkage** 9/09 12:28 pm
send some images so I can see what's going on

by the way, is getbookbyid working for you for the description display task?

YT **Yeu Haw Teh** 9/09 12:31 pm
yes getbookid works for both postman and frontend

i haven't figured out how to display it nicely yet

PP **Pemal Padukkage** 9/09 12:32 pm
but it can display the full information of the book?

regardless of niceness?

YT **Yeu Haw Teh** 9/09 12:33 pm
yes i can display it on console

PP **Pemal Padukkage** 9/09 12:34 pm
ah ok
so the main trouble is getting it to display it on the site

[Group-8]

Pemal Padukkage 9/09 12:34 pm
ah ok
so the main trouble is getting it to display it on the site

Yeu Haw Teh 9/09 12:34 pm
yeah but i guess dipto would give us a pass on that later today

Pemal Padukkage 9/09 12:37 pm
ok then
So back to the topic at hand, can you walk me through the issue you're having?

Yeu Haw Teh 9/09 12:43 pm
So if i do a search, it will return all the books in the database itself regardless if they are in the correct author that i'm looking for

```
                                                                    react_devtools_backend.js:4049
  ▼(4) [{…}, {…}, {…}, {…}] ⓘ
```

See more

that's the front end

Pemal Padukkage 9/09 12:44 pm
and the code?

Yeu Haw Teh 9/09 12:45 pm
```
export const getAuthor = (author, history) => async dispatch => {
```

Yeu Haw Teh 9/09 12:45 pm

```
export const getAuthor = (author, history) => async dispatch => {

    try {
        const res = await axios.get( url: "/api/books/", author);
        dispatch({
            type: GET_AUTHOR,
            payload: res.data
        });
        console.log(res.data);
    } catch (error) {
        history.push("/error");
    }
};
```

Pemal Padukkage 9/09 12:46 pm
'author' is the author query, right?

Yeu Haw Teh 9/09 12:47 pm
yes

but if i do "api/books/author" instead it'll not give anything back

Pemal Padukkage 9/09 12:52 pm
try this

12

it didn't work

You can find a complete log in the terminal.

❌ ▶ GET http://localhost:3000/api/books/author?author=%7B%22author%22:%22harper+le xhr.js:177
   e%22%7D 400 (Bad Request)

i keep getting bad request

Pemal Padukkage 9/09 1:15 pm
this is with the backend running?

Yeu Haw Teh 9/09 1:15 pm
yes

Pemal Padukkage 9/09 1:15 pm
alright

but why is it sending to port 3000?

and also another question, when a query is made with spaces, does the frontend automatically replaces spaces with '+'?

Pemal Padukkage 9/09 1:34 pm
in any case, try replacing the url with the entire url
"http://localhost:8080/api/books/author"

Yeu Haw Teh 9/09 1:40 pm

Meeting in "General" Join

i tired this last night "http://localhost:8080/api/books/author" and it c

Pemal Padukkage 9/09 1:41 pm
was it with the old axios function 'axios.get("/api/books/", author)'?

Yeu Haw Teh 9/09 1:42 pm
yeap

Pemal Padukkage 9/09 1:42 pm
try it using this instead then
await axios.get(""http://localhost:8080/api/books/author", {params: {author: author}})

by the way, I might be able to figure out the problem with a copy of your branch better, instead of just diagnosing it over teams

Yeu Haw Teh 9/09 1:44 pm
yeap same error from last night

❌ Access to XMLHttpRequest at 'http://localhost:8080/api/books/author?autho GetBookByAuthor:1
   r=%7B%22author%22:%22a%22%7D' from origin 'http://localhost:3000' has been blocked by CORS
   policy: No 'Access-Control-Allow-Origin' header is present on the requested resource.
❌ ▶ GET http://localhost:8080/api/books/author?author=%7B%22author%22:%22a%22%7D   xhr.js:177
   net::ERR_FAILED

alright i'll push my changes

[Group-8]

Yeu Haw Teh 9/09 5:13 pm
it works now

Pemal Padukkage 9/09 5:17 pm
Nice

We might have to handle spaces down the line, but for the time being, this should be enough

14

Pemal Padukkage 9/09 8:52 pm

Weekly Timeline from week 6 onwards:

Submission: Mon in week 7 (example tutorial session),
Upload deadline: Wed of week 6,
Voting period: Thu 00.01 - Mon 11.59 of Week 7,
Notice of winner: Tue morning Week 7,
Public Presentation: Lectorial in Week 7 (Wed or Thu).

Note that although Wed is the deadline for the public vote, the tutorial session time remains the official submission deadline for marking.

Note that the lectorial presentation can be live or the recording, however group members must be present for questions. This is true for both people's and tutor's choice winners.

Pemal Padukkage Monday 9:56 pm
EditUserBackEnd has been implemented, will be writing tests later today. If I have time, I may be able to add another feature, but it's unlikely due to a delay on one of my group projects.

Pemal Padukkage Tuesday 5:24 am
Update: all tests for editUser pass now. It's quite late, so I'll be pushing the branch later tomorrow/today.

Pemal Padukkage Wednesday 2:04 pm   Edited
UserEditBackEnd branch has been pushed now

Jeremy Chung Wednesday 8:45 pm   Edited
Question for Dipto Tomorrow: Do we need to push our Docker images (i.e: with; React-App, Microservices) to DockerHub (Public; as Private is limited to: 1). Or is the expectation that we only send our compiled jar files to the image, what should we do about the react-app then if that is the case?

Addition: What should the flow of the CI/CD configuration file be given the situation above^ (Build -> Test ->

Pemal Padukkage   Thursday 1:55 am
16/09 update: EditBookBackend has been implemented and tested, branch is now pushed to remote

Pemal Padukkage   Thursday 7:04 pm
I've had to step out for groceries for a bit, if I don't get back by the start of today's class just continue without me

Jeremy Chung   Thursday 7:05 pm
will do

Jeremy Chung   Thursday 7:33 pm   👍 1

No 2-marks checkpoint today
Prepare for submission due Sat 18 Sep

Pay attention to easy marks:

I suppose it's a good thing I included tests when I made those branches

Jeremy Chung   Thursday 7:53 pm

Dipto Pratyaksa   19:43
Milestone 1 you prepare the plan

Milestone 2 you populate the plan with real test results

Role play as the end user... how would they use it.. what are the implementation results.. can the functions actually work

Subham Kumar   19:47
alright, got it thank you

Yeu Haw Teh   Thursday 7:58 pm

```
//To use spaces for search, replace spaces in query with "%20"
@GetMapping("/author")
public ResponseEntity<?> getBooksByAuthor(@RequestParam String author){
    if(author.contains("%20")){
        author.replace(target: "%20", replacement: " ");
    }
}
```

Yeu Haw Teh   Thursday 7:58 pm

```java
        //To use spaces for search, replace spaces in query with "%20"
        @GetMapping("/author")
public ResponseEntity<?> getBooksByAuthor(@RequestParam String author){
        if(author.contains("%20")){
            author.replace("%20", " ");
        }
        List<Book> booksByAuthor = bookservice.getBooksByAuthor(author);
        if(booksByAuthor.size() > 0){
            return ResponseEntity.ok(booksByAuthor);
        }else{

I guess it wouldn't hurt to leave things commented out and resolve it later?

Pemal Padukkage   Yesterday 9:04 pm
I suppose

Yeu Haw Teh   Yesterday 10:23 pm
do we have to make tests for the frontend as well?

Jeremy Chung   Yesterday 10:25 pm

I think basic tests to see if pages and components are rendering are e

Yeu Haw Teh   Yesterday 10:26 pm
so do we use enzyme to test that?

Jeremy Chung   Yesterday 10:26 pm
its what his webinar uses, but I'm pretty sure its open ended

Yeu Haw Teh   Yesterday 10:27 pm
alright i'll have a look

Jeremy Chung   Yesterday 10:27 pm
as far as I know, enzyme and jest aren't replacements for reacts native testing library, its stuff you add on top of the tests: I think

Yeu Haw Teh   Yesterday 10:33 pm
oh is there something wrong with the frontend then?

Jeremy Chung   Yesterday 10:33 pm
nah, thats just the boilerplate tests generated when the project was created by homy

Yeu Haw Teh   Yesterday 10:34 pm
oh okay lmao

scared me there for a sec

Jeremy Chung   Yesterday 10:34 pm   Edited
I was just thinking that Dipto wouldn't mind how advanced the tests are as long as they check for component rendering and pass, with evidence that they pass in the docs/screenshots

Yeu Haw Teh   Yesterday 10:35 pm
yeah i guess so

being instead

Pemal Padukkage   1:08 am
Anyways, pushed branches "BlockUserBackEnd" and "ContactStaffBackEnd" to remote

Pemal Padukkage   2:54 pm
I've decided to make the AdminDashboardBackEnd operate by assigning an accounttype field for accounts

See more

Pemal Padukkage   3:01 pm
Main concern is that I'm not too sure on how to modify login to include the account type as it currently returns a bearer token, and changing that might turn out for the worse.

Pemal Padukkage   3:31 pm   Edited
Yeu Haw Teh Did you want to configure AdminDashboard so that it makes another search request by username after successful login and loads the dashboard based on the accounttype retrieved, or would you have something else in mind

Jeremy Chung   5:08 pm

Test plan vs test results 17.5 points

Jeremy Anything else you need from me before I'm done?
Just asking because there's quite a few things I had planned for today.

Alright, in that case I'll probably head off then

See you next meeting
